INFORMATION TECHNOLOGY AND AWS ADMIN INTERN Experience Information Technology and AWS Admin Intern , 04/2019 Company Name – City , State Researched and implemented a secure cloud infrastructure for migrating the financial data into AWS with seamless integration for company's financial department. Achieved an overall increment of 30% in efficiency by migrating the company's infrastructure to AWS cloud. Reduced the company's infrastructure cost by 10 times. Implemented secure off-site backups through scheduled weekly SSH dumps to remote server. Configured and troubleshot switches, routers and firewalls using TCP/IP protocols. Network Engineer Intern , 10/2015 Company Name Built LAN and WAN for small-scale business enterprises using HTTP, DHCP, DNS, OSPF, VLAN. AWS Certified Solutions Architect- Associate , 10/2018 Company Name – City , State ID-J007G7C1MFE41RSQ) Aug 2019

Cisco Certified Network Associate - CCNA 200-125 (ID-CSCO13264710. 04/2019 Company Name Set up a VPC network on Amazon and created public and private subnets, security groups, elastic IP and NAT gateway. Created an EC2 instance with Windows AMI to host an application on virtual machine

WAN network deployment for a multinational organization using Cisco Packet Tracer Fall 2018.

Configured routers, switches and implemented IP addressing, subnetting for a multi-location enterprise network using DHCP,

OSPF, HSRP, RSTP for routing and redundancy. Solved security threats by providing network security using ACL and port security

Linux Based Integrated Ad-Hoc Network for IT infrastructure (Linux, Ubuntu) Fall 2018. Designed and implemented a prototype illustrating a client-server model for hosting WebServer (Apache2), master and slave. Work History Information Technology and AWS Admin Intern , 04/2019 Company Name – City , State Researched and implemented a secure cloud infrastructure for migrating the financial data into AWS with seamless integration

for company's financial department. Achieved an overall increment of 30% in efficiency by migrating the company's infrastructure to AWS cloud. Reduced the company's infrastructure cost by 10 times. Implemented secure off-site backups through scheduled weekly SSH dumps to remote server.

Configured and troubleshot switches, routers and firewalls using TCP/IP protocols. Network Engineer Intern , 10/2015 Company Name Built LAN and WAN for small-scale business enterprises using HTTP, DHCP, DNS, OSPF, VLAN. AWS Certified Solutions Architect- Associate , 10/2018 Company Name – City , State ID-J007G7C1MFE41RSQ) Aug 2019

Cisco Certified Network Associate - CCNA 200-125 (ID-CSCO13264710. 04/2019 Company Name Set up a VPC network on Amazon and created public and private subnets, security groups, elastic IP and NAT gateway. Created an EC2 instance with Windows AMI to host an application on virtual machine

WAN network deployment for a multinational organization using Cisco Packet Tracer Fall 2018.

Configured routers, switches and implemented IP addressing, subnetting for a multi-location enterprise network using DHCP,

OSPF, HSRP, RSTP for routing and redundancy. Solved security threats by providing network security using ACL and port security

Linux Based Integrated Ad-Hoc Network for IT infrastructure (Linux, Ubuntu) Fall 2018. Designed and implemented a prototype illustrating a client-server model for hosting WebServer (Apache2), master and slave. Accomplishments DNS(Bind9) server, DHCP Server and Backup server. Integrated the network to release dynamic IPv4 and IPv6 addresses to provide firewall protection, NFS, IPsec VPN

Multi-client server chat application Spring 2018. Developed a real time multi-client server chat application in Python for a chat group by implementing socket programming. Secured the application by providing features like AES encryption, SHA 256, MD5 and symmetric key method Client server Socket Programming using TCP in Python Fall 2017. Developed a Python script for the client on Linux for performing a set of mathematical expressions sent by the server. Evaluated the result by receiving a flag sent by the server to the client on successful execution of the mathematical

expressions, indicating a secure and successful TCP socket client-server connection establishment SDN based Load Balancer Fall 2017. Designed a software-defined network to provide server load distribution for a pool of HTTP servers by analyzing the incoming

packets and routing accordingly. Optimized congestion by performing load balancing in round robin technique for the POX controller by using Openflow Switch

Client -server application for public-key cryptography in Python Fall 2017. Developed a secured TCP connection for encryption and decryption of text file and matched the output at the receiver. Created public key cryptography to generate a set of public and private key (.pem file) by using RSA cryptosystem. Education Master of Science : Telecommunication and Networks , 12/2019 Northeastern University, Solapur University - City , State Bachelor of Engineering : Electronics and Telecommunications , 06/2016 Summary Actively seeking full time opportunities from December 2019 Highlights IP networking protocols :TCP/IP,UDP,HTTP/S,DHCP,DNS,STP,HSRP,ISIS,RIP,OSPF,MPLS,FTP,SMTP,IPSec,VLAN,VPN Network Tools :Wireshark,VMware,Cisco Packet Tracer,VirtualBox, Oracle,Windows Server,AWS,Active Directory Operating Systems :Windows,Linux,CentOs,Ubuntu,RHEL Programming languages: Python,Bash Scripting Coursework : Data Networking,Linux for Network Engineers,Internet Protocols & Architecture,Network Security, Computer Communication Networks,Multimedia Communication Active Directory, Routers Ad, Routing Apache2, SSH Bash, Scripting CCNA, SMTP Cisco Certified Network Associate, Switches Cisco, TCP/IP Client-server, VPN DHCP, WAN DNS, Windows Server Financial Firewalls FTP Gateway HTTP Internet Protocols IP ISIS LAN Linux Windows Multimedia Enterprise Network Security Network Networking Networks Operating Systems Oracle OSPF Programming Protocols Python RIP Skills IP networking protocols :TCP/IP,UDP,HTTP/S,DHCP,DNS,STP,HSRP,ISIS,RIP,OSPF,MPLS,FTP,SMTP,IPSec,VLAN,VPN Network Tools :Wireshark,VMware,Cisco Packet Tracer,VirtualBox, Oracle,Windows Server,AWS,Active Directory Operating Systems :Windows,Linux,CentOs,Ubuntu,RHEL Programming languages: Python,Bash Scripting Coursework : Data Networking,Linux for Network Engineers,Internet Protocols & Architecture,Network Security, CComputer Communication Networks,Multimedia Communication, Active Directory, Ad, Apache2, Bash, CCNA, Cisco Certified Network Associate, Cisco, client-server, DHCP, DNS, financial, firewalls, FTP, gateway, HTTP, Internet Protocols, IP, ISIS, LAN, Linux, Windows, Multimedia, enterprise, Network Security, Network, Networking, Networks, Operating Systems, Oracle, OSPF, Programming, protocols, Python, RIP, routers, routing, SSH, Scripting, SMTP, switches, TCP/IP, VPN, WAN, Windows Server
